FREELANCE PROJECTS

Dr Vo Shop - <https://drvoshop.com/>

This is a web shop for small business. Worked in a small team involved in front end development. Some of my tasks included pagination, CRUD operations, handling form data, drag and drop feature, etc. This project is live, but still in development. Tech stack: React.js, Next.js on frontend, PHP on backend.

Land Essence - <https://landessence.netlify.app/>

This is a website for landscape architecture studio. Worked independently on the entire application with features like multi-language selection, email form, gallery, animations, etc.

Tech stack: React.js.
